HAN-GINS Tech Megatrend Equal Weight UCITS ETF

Factsheet | Data as of 30 Sep 2020

Investment Objective

HAN-GINS Tech Megatrend Equal Weight UCITS ETF (ITEK) is a UCITS compliant Exchange Traded Fund domiciled in Ireland. ITEK tracks the Solactive Innovative Technologies Index (Net Total Return), an index of leading companies that are driving innovation in sectors including Robotics & Automation, Cloud Computing & Big Data, Cyber Security, Future Cars, Genomics, Social Media, Blockchain and Digital Entertainment.

Why ITEK?

Global Trends:

ITEK constituents are not limited to one region or country, providing exposure to innovative companies on a global basis.

Transparent, Modern Approach:

ITEK follows a transparent rules-based index to identify and capture companies that are leading technology innovation.

Efficient:

In a single trade, ITEK delivers exposure to a diversified basket of companies with high exposure to the innovative technology theme.

Diversification:

ITEK avoids concentration in larger stocks by using a double diversification approach that allocates an equal weight to each innovative theme and then equal weights constituents within that theme.

Key Risks

1. The value of equities and equity-related securities can be affected by daily stock and currency market movements
2. Thematic ETFs are exposed to a limited number of sectors and thus the investment will be concentrated and may experience high volatility
3. Investors' capital is fully at risk and may not get back the amount originally invested
4. Exchange rates can have a positive or negative effect on returns
5. Further risks are disclosed in the KIID and Prospectus
