HAN-GINS Indxx Healthcare Megatrend Equal Weight UCITS ETF - Acc

Factsheet | Data as of 30 Jun 2022

## Investment Objective

HAN-GINS Indxx Healthcare Megatrend Equal Weight UCITS ETF (WELL) is designed to capture securities at the cross-roads of medicine and technology which are shaping the future of healthcare. In a single trade, WELL health ETF delivers equal weight exposure to over 100 global companies from the following 10 sub-themes: robotics; nanotechnology; genome sequencing; healthcare trackers; biological engineering; bioinformatics; neuroscience; medical devices; telemedicine and healthcare analytics.

## Why WELL?

### Broad exposure to healthcare innovators

Healthcare innovations are well positioned to deliver strong growth rates as the traditional healthcare sector is undergoing significant change and modernisation in the wake of Covid and thanks to the availability of new technologies. WELL has been updated in 2021 to include innovative themes such as Telemedicine and Healthcare Analytics, which have both proved immensely important in tackling Covid-19.

### Capturing growth more efficiently through equal weighting

Capturing growth more efficiently through equal weighting WELL health ETF avoids concentration in larger stocks by using an equal weighting methodology. This enables smaller yet innovative companies to better contribute to WELL's performance. The number of companies in each sector will be capped, subject to avoid an overreliance on any-one subtheme.

### ESG screen

WELL only includes companies that comply with the UN Global Compact principles, who are not involved with controversial weapons and who have low fossil fuel exposure.

## Key Risks

1. The value of equities and equity-related securities can be affected by daily stock and currency market movements.
2. Emerging & frontier markets are subject to greater market volatility than developed markets.
3. Investors' capital is fully at risk and investors may not get back the amount originally invested.
4. Exchange rate fluctuations could have a negative or positive effect on returns.

## Performance and Volatility Indicators (USD)

Period	Return	Volatility
2017	34.20%	10.12%
2018	6.56%	19.53%
2019	25.40%	15.36%
2020	27.85%	29.55%
2021	-6.77%	19.08%
2022	-33.96%	39.50%

\*Index data up to the 03/04/2019. Fund data from 04/04/2019

Performance before inception is based on back tested data. Back testing is the process of evaluating an investment strategy by applying it to historical data to simulate what the performance of that strategy would have been. Back tested data does not represent actual performance and should not be interpreted as an indication of actual or future performance. Past performance for the index is in USD and shown net of fees. Past performance and back tested index performance is not an indicator for future results and should not be the sole factor of consideration when selecting a product. It is provided for illustrative purposes only. Indices cannot be invested in directly. Investors should read the prospectus of the Issuer ("Prospectus") before investing and should refer to the section of the Prospectus entitled 'Risk Factors' for further details of risks associated with an investment in this product. This communication has been prepared for professional investors, but the ETCs and ETFs set out in this communication ("Products") may be available in some jurisdictions to any investors. Please check with your broker or intermediary that the relevant Product is available in your jurisdiction and suitable for your investment profile.

Past performance is not a reliable indicator of future performance. The price of the Products may vary and they do not offer a fixed income.

This document may contain forward looking statements including statements regarding our belief or current expectations with regards to the performance of certain assets classes. Forward looking statements are subject to certain risks, uncertainties and assumptions. There can be no assurance that such statements will be accurate and actual results could differ materially from those anticipated in such statements. Therefore, readers are cautioned not to place undue reliance on these forward-looking statements. The content of this document is for information purposes and for your internal use only, and does not constitute an investment advice, recommendation, investment research or an offer for sale nor a solicitation of an offer to buy any Product or make any investment.

An investment in an exchange traded product is dependent on the performance of the underlying asset class, less costs, but it is not expected to track that performance exactly. The Products involve numerous risks including among others, general market risks relating to underlying adverse price movements in an Index (for ETFs) or underlying asset class and currency, liquidity, operational, legal and regulatory risks. In addition, in relation to Cryptocurrency ETCs, these are highly volatile digital assets and performance is unpredictable.

The information contained on this document is not, and under no circumstances is to be construed as, an advertisement or any other step in furtherance of a public offering of securities in the United States or any province or territory thereof, where none of the Issuers (as defined below) or their Products are authorised or registered for distribution and where no prospectus of any of the Issuers has been filed with any securities commission or regulatory authority. No document or information on this document should be taken, transmitted or distributed (directly or indirectly) into the United States. None of the Issuers, nor any securities issued by it, have been or will be registered under the United States Securities Act of 1933 or the Investment Company Act of 1940 or qualified under any applicable state securities statutes.
